# Weekly Update

Good afternoon Greendale families.

This past week I have been overwhelmed by the supportive community that we have. Our first ever Boot Drive was a huge success. Many of you contributed brand new boots as well as gently used ones for our students. I believe that all of our students are now set for the winter months with proper footwear. If your child still needs boots for the winter, please email me, or have them come to see me and I will take care of them. Also, our Project Share drive has been really well supported by our community again this year. The barrels at the front of the school are overflowing. We will continue to collect canned/dry goods, toys and toiletries until Wednesday of next week. Many families in Niagara Falls will benefit from your contributions.

This morning you will have received some information about Rapid Antigen Testing kits that will be made available for all students over the holidays to help ensure a safe start up to school in January. This was sent via School Cash on-line. Please take a moment and complete one of the 3 options that are part of this survey. Just to clarify as I've had a few inquiries already – these are for kits that will be for your use at home, not at the school.

Next week our Intermediate Boys' Volleyball team will be playing in the DSNB tournament. This will wrap up our interschool sports until January. They have been practicing hard, and we wish them luck on the 8<sup>th</sup>.

A reminder to continue to make sure you complete the daily Covid Screening for your child every morning before they attend school. I know there were some issues early on with this process, but I believe it is now working well.

Lately we have been experiencing our usual sloppy early winter weather here in Niagara Falls. Please make sure your child has a pair of indoor shoes at school as our field area is quite muddy at times.

Thanks for your continued support!

Have a great weekend.

C. Glauser
